

The ASFPM Foundation Projects Committee is soliciting projects for funding for FY2023. The intent of this solicitation is to request and identify project proposals that are consistent with the Foundation Mission Statement as stated below:

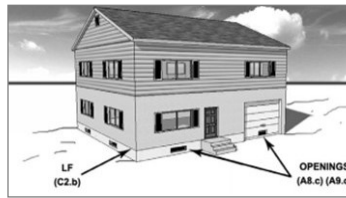

“ASFPM Foundation serves as the catalyst for ASFPM, its chapters and members to advance projects, education and policy initiatives that promote reduced flood risk and resilient communities”

RISE Challenge

NAI Toolkit How-to-Guides

Georgia Certificate Guide

Wetland Managers Workshops

Typical projects previously selected for ASFPM Foundation funding are illustrated above and include:

- **The RISE Challenge.** A mitigation competition for middle and high school students that engages young people in developing community resilience to environmental hazards with projects that increase their own community's ability to both prepare for and mitigate the effects of natural disasters.
- **ASFPM Georgia Chapter “Elevation Certificate Reference Guide”.** This project provides a template for development of an elevation certificate reference guide with supporting illustrative diagrams, search engine and web reference guide.
- **Development of the ASFPM NAI Toolkit “How-to-Guides.”** Development of Emergency Services Guide and support for four additional How-to-Guides.
- **Association of State Wetland Managers.** This project supported the integration of sustainable, function-based wetland, floodplain and riparian geospatial mapping techniques and data into floodplain and aquatic resource management programs.

The funding available from the ASFPM Foundation for the FY2023 project proposals is \$20,000. Depending on the number of submittals that are received and the associated funding needs, the funding can be utilized to support: (a) multiple small projects, (b) one to two larger projects, or (c) supplemental funding for a project that exceeds \$20,000.

Proposals should provide a detailed description of the project including: (a) purpose and benefits of the project, (b) how the project meets the mission of the ASFPM Foundation, (c) details describing the coordination, effort, and completion of the project, (d) identification of the individuals/entities involved in completion of the project, (e) itemized project budget including maintenance costs if applicable, and (f) project schedule. Ideally, projects submitted for evaluation should be completed within one year following initiation of the project.

Project proposals will be evaluated by the Projects Committee members based on: (a) outcomes to advance education and policy initiatives that promote reduced flood risk and resilient communities, (b) benefit and applicability to ASFPM members, ASFPM chapters and Foundation donors/members nationwide, (c) outreach benefits to support growth of ASFPM/Foundation members along with potential collaboration with other organization to strengthen existing partnerships or establish new partnerships, (d) project cost, and (e) project

schedule. Following the evaluation, project funding recommendations will be formulated and presented to the ASFPM Foundation Board for discussion and approval.

The deadline for project proposals along with the contact information with respect to questions regarding the proposal submittal is provided below.
